Summary

Motivated and detail-oriented B.Tech  Computer Science student at Thapar Institute of Engineering and Technology, currently in the 4th semester, with knowledge of Java, C++, Python, HTML, CSS, JavaScript, MySQL, and Data Structures & Algorithms. Passionate about software development and problem-solving, with hands-on experience building academic and personal projects such as a supermarket billing system and an e-commerce website. Eager to apply technical skills, learn from real-world industry experience, and contribute effectively to a dynamic team through a remote internship opportunity.

Education

Bachelor of Technology (B.Tech) in Computer Science,

05/2028

Thapar Institute of Engineering and Technology

Patiala, Punjab, India

- Currently in 4th Semester
- Relevant Coursework: Data Structures and Algorithms, Object-Oriented Programming, Web Development, Database Management Systems

Technical Skills

Programming Languages

Java, C++, Python, JavaScript

Web Technologies

HTML, CSS, JavaScript

Database

MySQL

Core Concepts

Data Structures and Algorithms, Problem Solving, Object-Oriented Programming

Languages

- English
- Hindi
- Punjabi

Projects

Supermarket Billing System, C++

- Developed a console-based billing system to manage item entry, customer billing, and total bill calculation
- Implemented menu-driven options such as adding items, generating bills, and exiting the system
- Strengthened understanding of C++ programming, functions, conditional logic, and structured problem-solving

Clothing Shopping Website, HTML, CSS, JavaScript

- Built a multi-page e-commerce website with pages such as Home, Blog, Shop, and Shopping Cart
- Designed the frontend interface using HTML and CSS and added interactive website behavior using JavaScript
- Improved practical skills in frontend development, page structuring, and user-focused web design

Certifications

GeeksforGeeks DSA Self-Paced Course

- Completed online course focused on Data Structures and Algorithms
- Duration: 2025-07 - 2026-01
